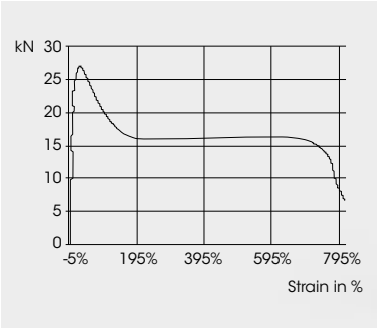
UNIVERSAL TENSILE TESTER

DESCRIPTION

The universal tensile tester is used for performing tension, pressure or bending tests. The classic application is the tensile test. This involves subjecting a sample to an increasing tensile load until it breaks. The force-deflection diagram generated during this test provides information on the load-bearing capacity, elasticity and plastic deformation of the material sample.

Accessories



Simple and safe operation

- Convenient operation and clear visualisation (test curves, calculations and statistics) via integrated touch display
- Easy to change the grips

Reliable test results

- Accuracy: ±0.5% of the measurement up to 1/1000 of the max. measuring range

Lasting efficiency

- Precise, self-cleaning ballscrew with sealed, maintenance free bearings for low-noise operation
- Brushless servo motor for maintenance-free operation

State of the art technology

- Automatic detection and calibration of load cells and extensometers
- 800% overload protection

UNIVERSAL TENSILE TESTER

Standards
ISO 527
ISO 6259
ASTM D 638

Versions

		T031630V1P	T031630V2P	T031630V3P	T031630V4P
Test force	kN	5	20	50	300
Max. crosshead travel excluding grips	mm	1100	1100	980	600
Vertical space	mm	1275	1275	1180	1450
Throat	mm	295	295	420	500
Crosshead speed	mm/min	0.001 - 500	0.001 - 500	0.001 - 500	0.001 - 500
Speed accuracy (under stable conditions)	%	0±0.1			
Extensometer		●			
Wedge grips		○			
Grips for large wall thickness		○			
Peel test fixture for composite pipes		●			
Compression plates		○			
Further accessories		On request			
CE conformity		●			
Permissible ambient temperature	°C	10 to +40			
Permissible relative humidity		10 - 90%, non-condensing			
Width	mm	590	980	980	1250
Depth	mm	450	600	600	900
Height	mm	1575	2250	2250	2600
Weight	kg	156	600	675	2800
Voltage data		**3 ph 380/400 VAC, 50/60 Hz (other voltages on request)**			

● included ○ available / optional □ eligible - not available
